

IT351 – Human Computer Interaction

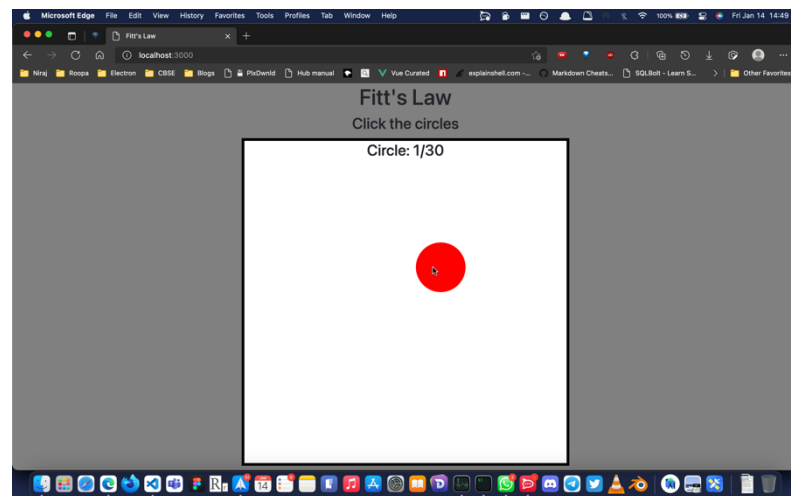

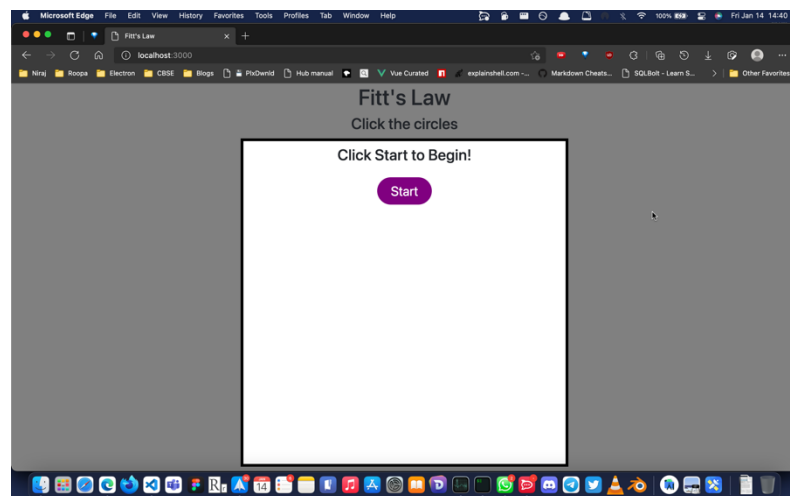

Assignment 1 – Fitts's Law

Name: Niraj Nandish

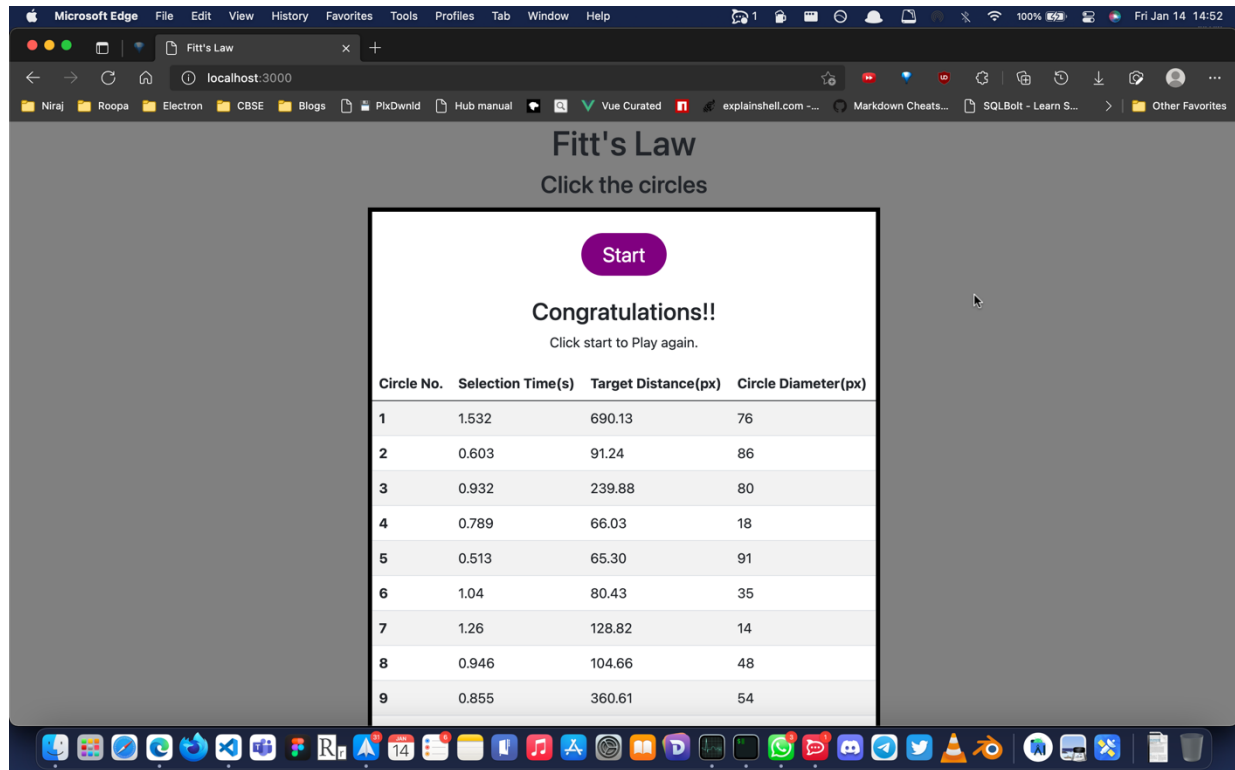

Roll No: 191IT234

Fitts's Law states that the time taken for a person to move a pointer or cursor to a target area is a function of the distance of the distance to the target divided by the size of the target. Hence, longer the distance and smaller the target's size, longer the selection time.

An interface was created to demonstrate this law. The user will be shown 30 circles of varying diameter and made to click on them all the while recording their selection time. A table is shown at the end of the experiment with the selection time, diameter of circle and circle distance from cursor. There is also a graph between diameter of target and selection time of the target. This experiment also compares the difference when using a touchpad and a mouse.

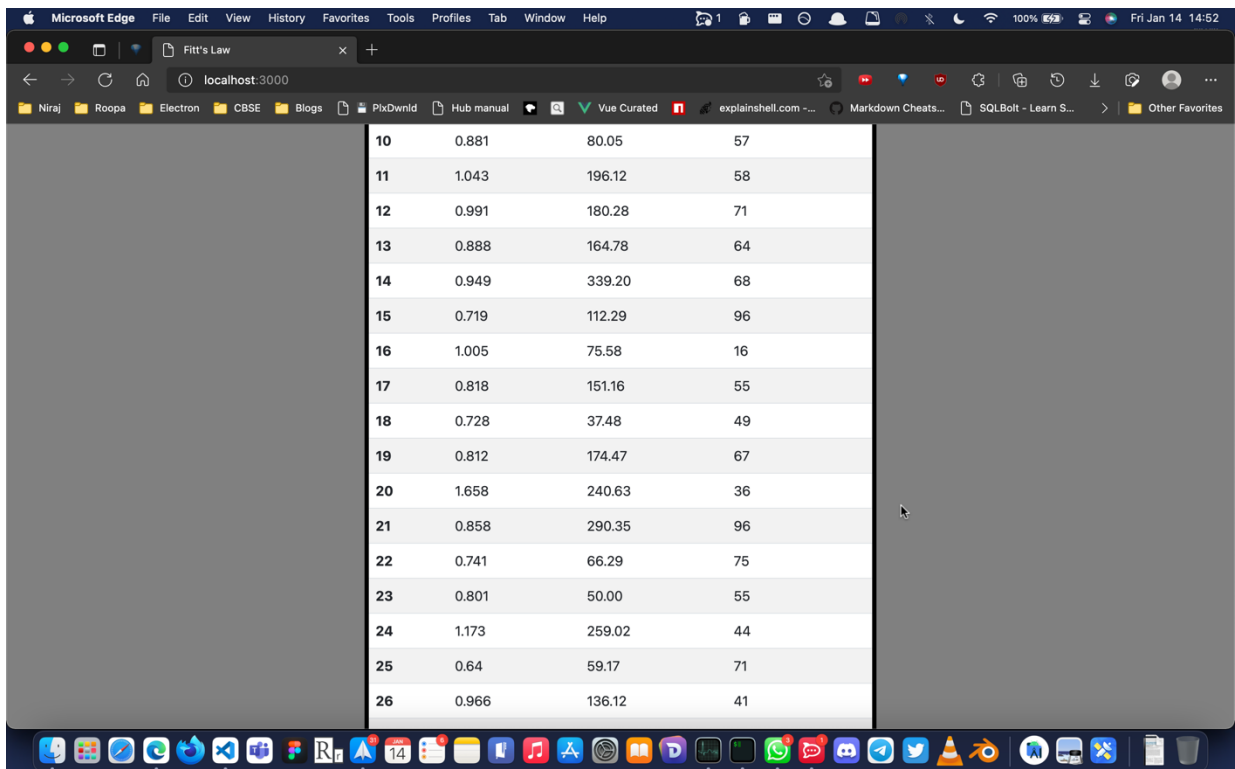

Results when using Touchpad

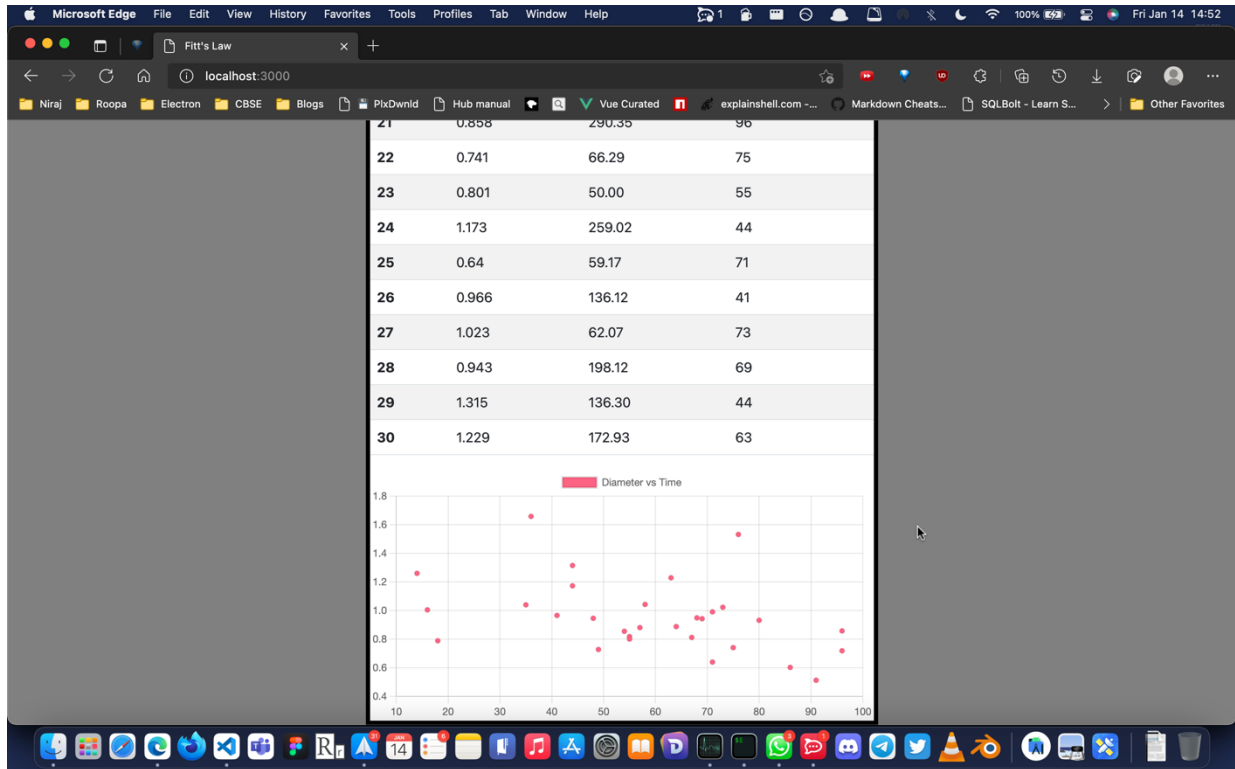

The screenshot shows a web browser window with the title 'Fitt's Law' and the instruction 'Click the circles'. A purple 'Start' button is visible. Below it, a message says 'Congratulations!!' and 'Click start to Play again.' A table displays the results for 9 circles.

Circle No.	Selection Time(s)	Target Distance(px)	Circle Diameter(px)
1	1.532	690.13	76
2	0.603	91.24	86
3	0.932	239.88	80
4	0.789	66.03	18
5	0.513	65.30	91
6	1.04	80.43	35
7	1.26	128.82	14
8	0.946	104.66	48
9	0.855	360.61	54

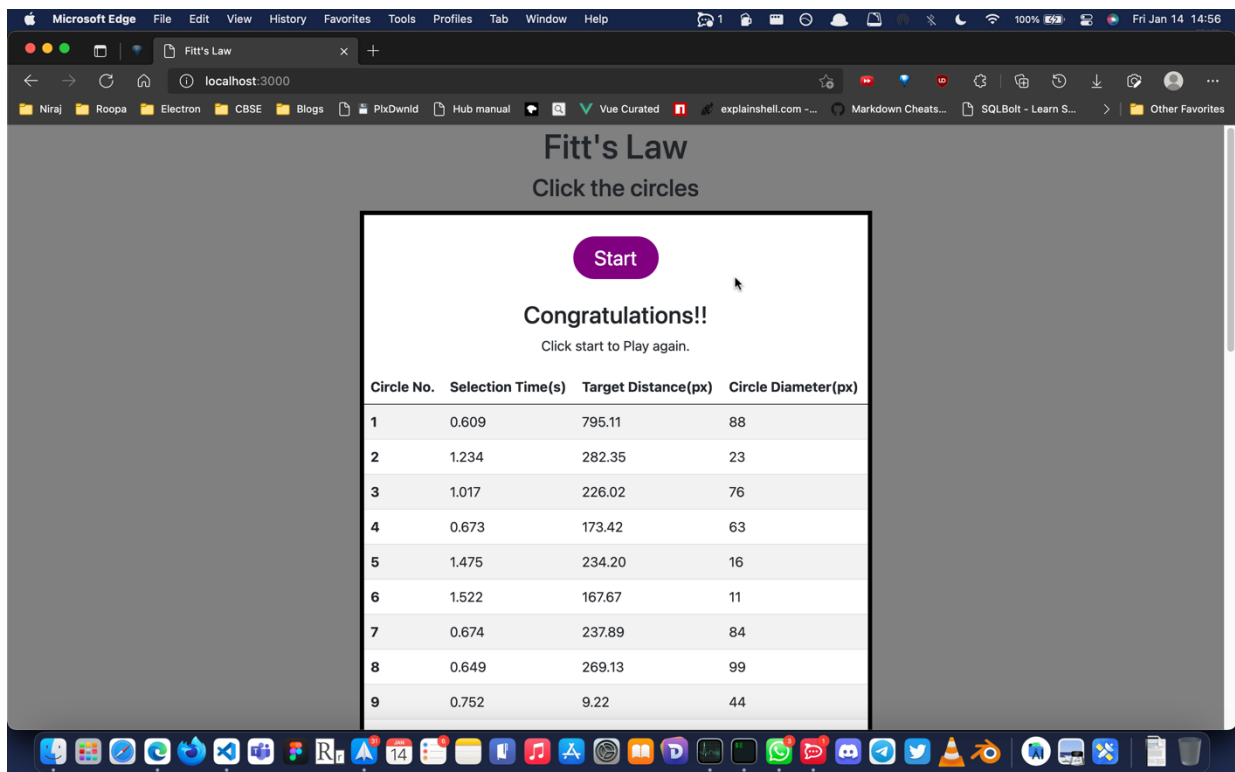

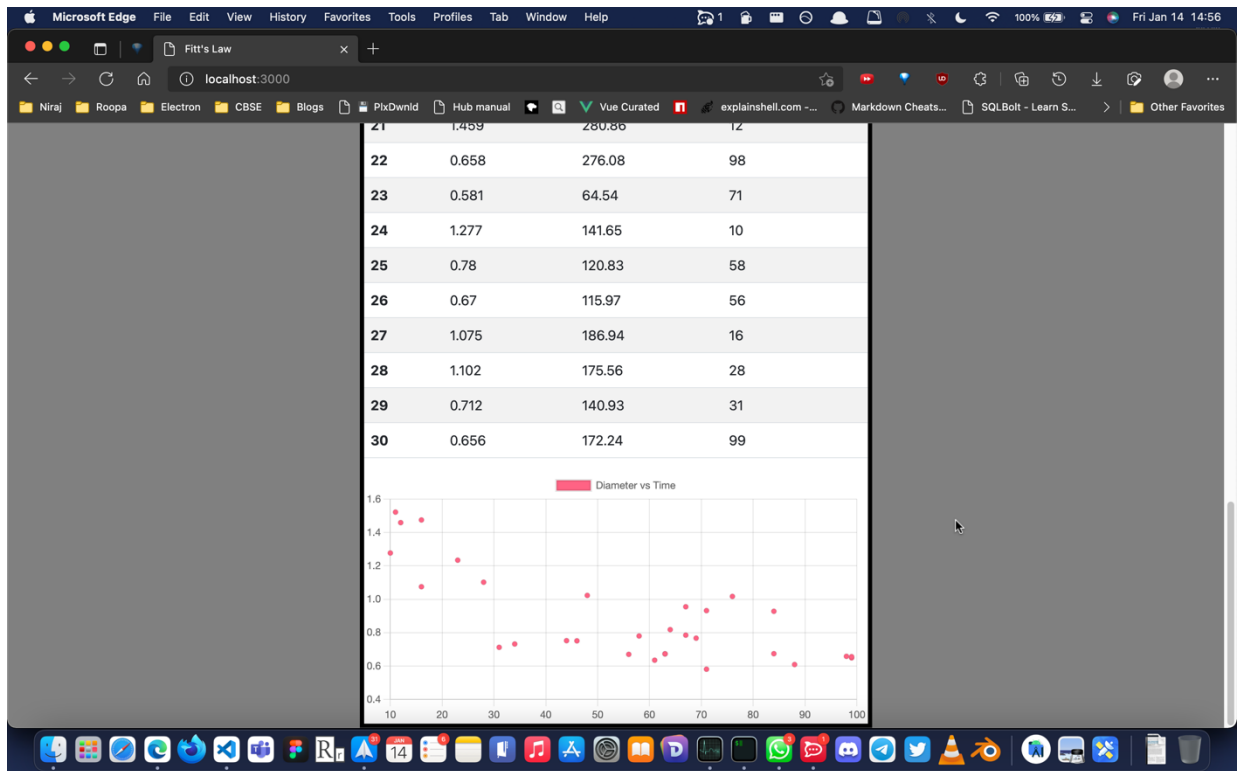

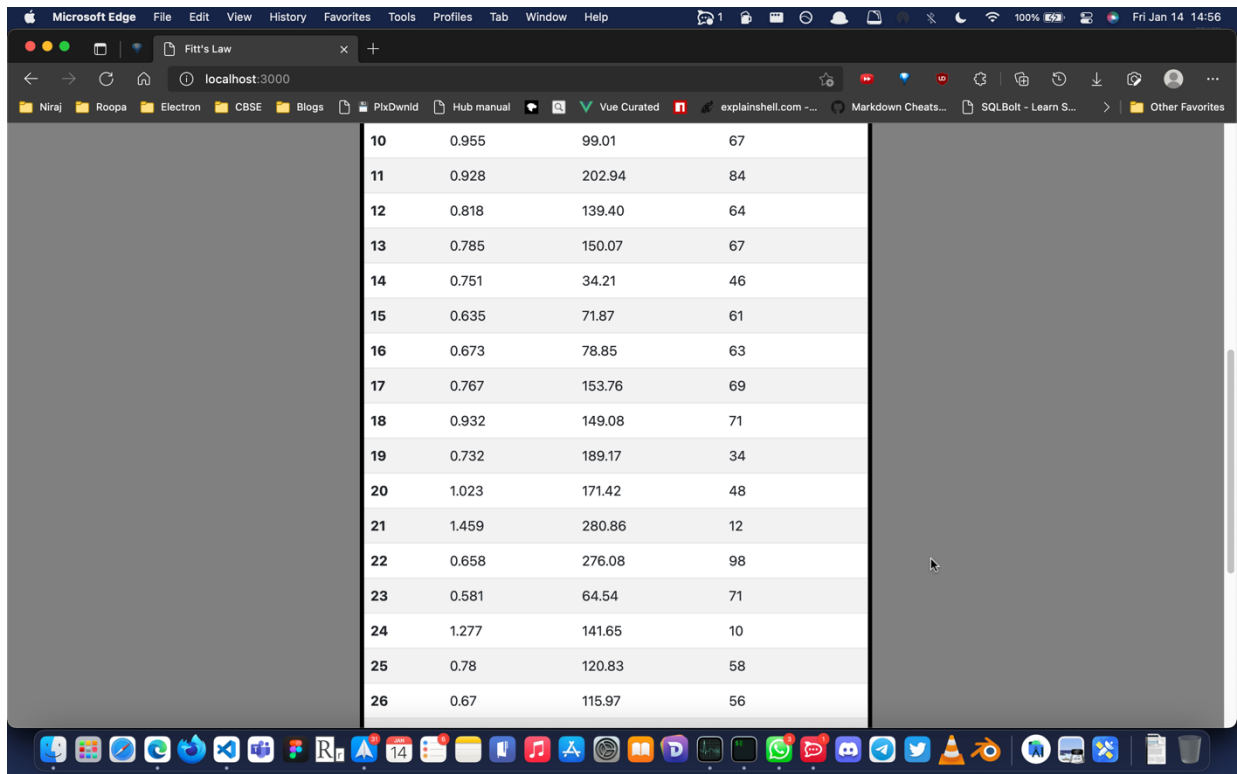

The screenshot shows the same web application with a table displaying results for circles 10 through 26.

10	0.881	80.05	57
11	1.043	196.12	58
12	0.991	180.28	71
13	0.888	164.78	64
14	0.949	339.20	68
15	0.719	112.29	96
16	1.005	75.58	16
17	0.818	151.16	55
18	0.728	37.48	49
19	0.812	174.47	67
20	1.658	240.63	36
21	0.858	290.35	96
22	0.741	66.29	75
23	0.801	50.00	55
24	1.173	259.02	44
25	0.64	59.17	71
26	0.966	136.12	41

Results when using Mouse

Conclusion – From the above graphs and tables, we can see that the average selection time for mouse is lesser than when using a touchpad. Hence, using a touchpad increases the target selection difficulty as compared with a mouse.
